

Hur du ändrar position size på algon

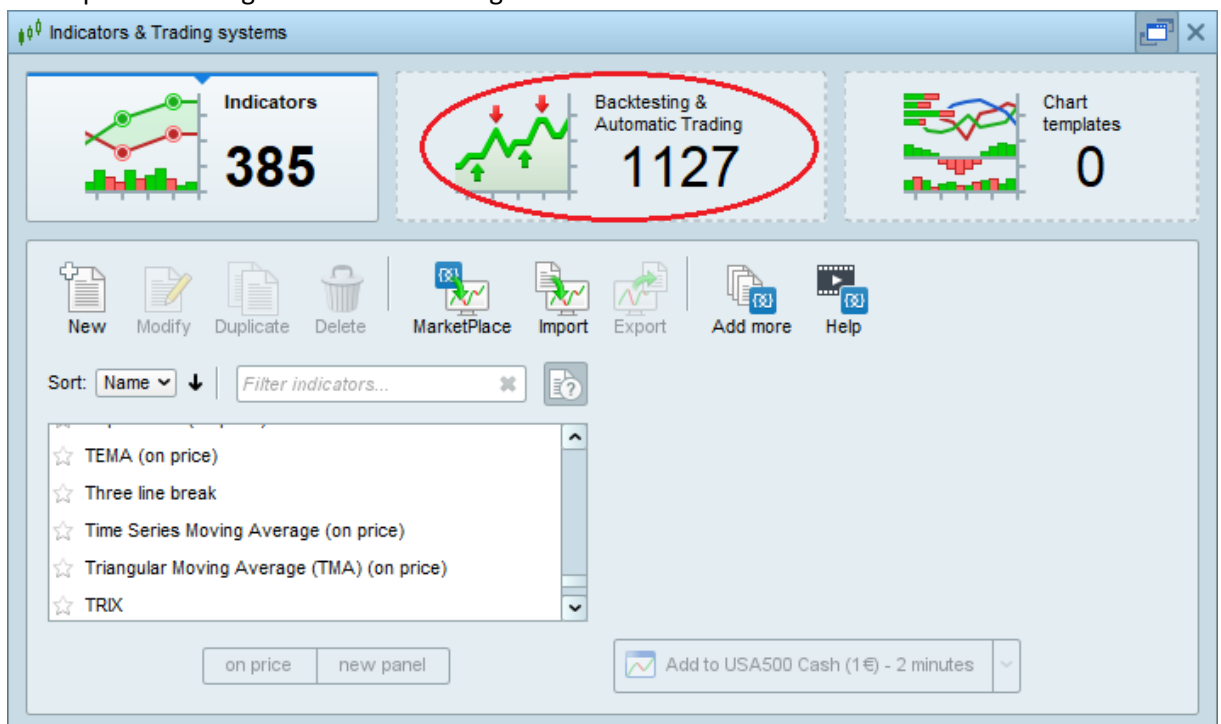

1. Börja med att stoppa algon om du har den igång
2. Öppna ett chart av det instrument/index algon ska köras på. I exemplet nedan ska vi ändra position size på SPX Smasher M2 som körs på USA500 Cash (1€)

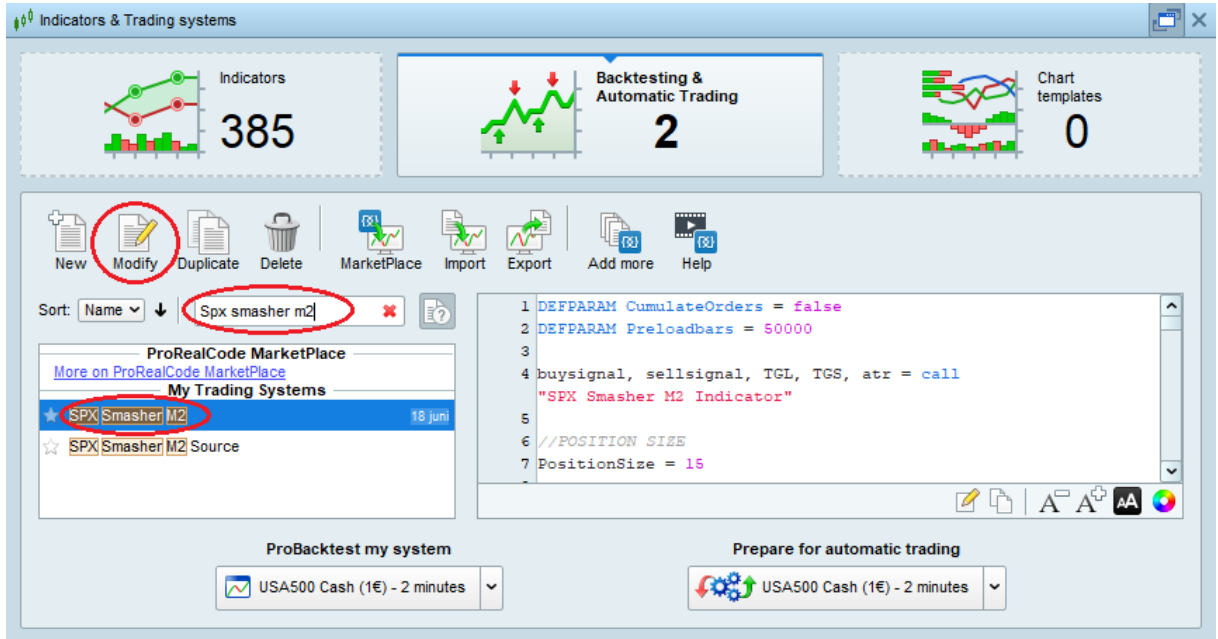

3. Klicka på Indicators i toppen av chartet

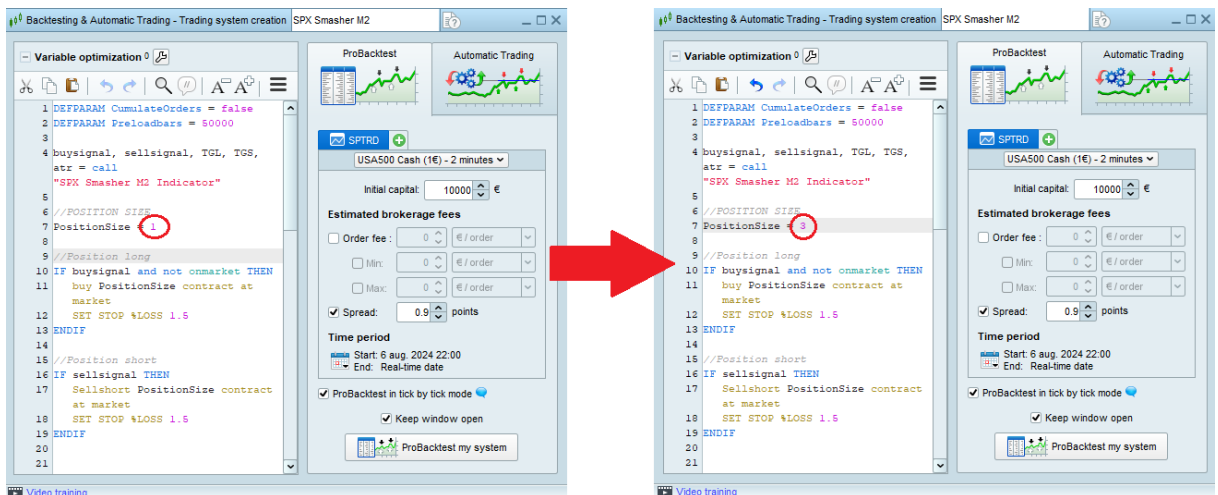

4. Klicka på Backtesting & Automatic trading

5. Leta upp algon (i det här exemplet SPX Smasher M2) och klicka på Modift

6. Ändra position size på raden där det står PositionSize. I det här exemplet ändrar vi position size från 1 till 3.

7. Nu är det dags att starta algon igen. Klicka på Automatic Trading
